SRNS-F8000-2021-00088

Dear Subcontractor/Supplier/Vendor:

MANDATORY VACCINATION – ACCESS IN ALL DOE BUILDINGS, LEASED SPACES AND PREMISES

In response to the Executive Order on Ensuring Adequate COVID Safety Protocols for Federal Contractors, issued September 9, 2021, Savannah River Nuclear Solutions (SRNS) has mandated vaccination as a condition to access the Department of Energy (DOE) Savannah River Site (SRS) for those subcontractor personnel performing work under a contract to SRNS. As you may be aware, the President recently signed an executive order mandating such vaccinations for all individuals operating under government funded contracts. SRNS may be issuing further instructions to address any additional impacts to your subcontract or agreement after receiving the implementing guidance associated with this Presidential Executive Order. However, at a minimum, SRNS is requiring all badged subcontractor personnel who require access to SRS to have received at least one dose of the vaccine by October 15, 2021 and be fully vaccinated by November 30, 2021. It is expected that personnel will have to present proof of vaccination. Lastly, access to the site will be denied to those failing to abide by these new requirements.

Reminders:

- All personnel should monitor their temperature daily prior to reporting to SRS. Temperature monitoring stations are available across the site for those who are unable to monitor prior to their arrival, or those who experience a change in condition during their workday.
- Personnel are expected to report a temperature of 100.4 degrees or higher to their Subcontract Technical Representative/End User and remain at home or, if they are at work, depart immediately after notifying the appropriate personnel.
- All personnel shall follow their company's sick policy for personnel who are either sick and telework is not authorized, or an employee is too sick to work.

Continue to follow site COVID-19 protocols, which includes resumption of certain mask and social distancing requirements.

For additional assistance, please contact the SRS Infectious Disease Response Team (IDRT) War Room at (803) 952-8883 or (803) 952-8884.

As a final reminder, additional COVID-19 information is posted in SRS facilities. You are strongly encouraged to frequently review these materials for additional information regarding SRS protocols.

Sincerely,

FREDERICK
